Stylin' Photo Cube

Step 2: Prepare Work Surface

Cover work surface with paper or a plastic table cloth to avoid getting paint where you don't want it.

Step 3: Paint the Cube

Paint 2 or 3 sides of the cube with acrylic paint. Let dry completely.

Step 4: Cut Paper Squares

Trace one side of the cube onto 4 sheets of paper and cut out 4 squares.

Step 5: Adhere Paper to Cube

Adhere paper squares to the cube with a flat stick paste or glue.

Step 5: Add Photos

Trim photos and adhere to 4 sides of the cube.

Step 6: Finishing Touches

Embellish with letters, stickers, stamps, ribbon, beads or glitter and enjoy!

**Trick: If you want the paper to fit your cube exactly, use a piece of medium grit sandpaper to sand off any excess paper after you've glued it to the cube.*
