

# Got Paper?

Crafters, listen up. If you like to do card making, mosaics, photo art, scrapbooking, gift wrapping, collage or other paper crafts, there's a new place to do it in Manchester. **Talk, Paper, Scissors** on South Willow Street offers crafters a great space, all the needed supplies — and inspiration. Take a class (Custom Rubber Stamp and Stationery Design is one) or arrange a private party (you can have it at your home, office or school, if you want). For more information, visit [www.talkpaperscissors.com](http://www.talkpaperscissors.com).

“I’m so glad we called Dovetailed Kitchens.”

# Hippie No Longer

Janine Gilbertson says people have a misconception about bead shops, like the one she owns in Peterborough: “They think it’s going to smell like patchouli, with some hippie guy reading ‘Rolling Stones’ in the back.”

Wrong, she says. Today the shops are places of avant garde and elegant jewelry design, where “you can create a high-end look without dropping 60 bucks.”

At her Grove Street shop you’ll find an array of beads — seed beads from Japan and Czechoslovakia, ceramic and shell beads, Swarovski crystal beads (“they are huge these days”), semi-precious stone beads, tiger eyes (“they’re coming back”) and beads made by local artisans. Add sterling silver and gold-filled components, says Gilbertson, and “you can make something you saw at Tiffany’s.” For more information, visit [www.thebeadboxwebsite.com](http://www.thebeadboxwebsite.com).
